

Exploring SAP Cloud ERP

Kód kurzu: S4CP01

This course provides learners with a thorough overview of the deployment options available with the RISE with SAP offering, including the platforms, processes, services and tools available to them as a customer and/or an SAP implementer. The learner will explore Business Transformation as a Service, SAP Digital Discovery Assessment, sell and delivery qualifications (e.g. PartnerEdge), and the Partner Demonstration Landscape. Learners will also make good use of existing tools for implementations, such as SAP Roadmap Viewer, SAP Best Practices Explorer, Cloud Application Lifecycle Management (CALM) Implementation Portal, Solution Manager, and close the course will a very good understanding of the various RISE with SAP S/4HANA Cloud system landscapes. After completing this course, you can augment your learning by joining the SAP S/4HANA Cloud Implementation Learning Room in the SAP Learning Hub, for example, and take advantage of the hundreds of micro-learning live sessions across fundamentals, lines of business deep dives, integration scenarios, and cross topics. Course based on software release: 2022 (private edition) and 2208.2 (public edition).
