Virtual Machine Management in Red Hat OpenStack Services on OpenShift

Kód kurzu: CL118

Virtual Machine Management in Red Hat OpenStack Services on OpenShift (CL118) delivers hands-on skills in creating, configuring, and managing virtual machine instances. Operators learn to prepare deployment resources such as projects, images, flavors, and SSH key pairs. They also configure project networks and persistent storage resources for application workloads, and perform instance operations such as creating snapshots, resizing, rebuilding, and troubleshooting. This course is based on Red Hat OpenStack Services on OpenShift 18.0.
