Advanced System Operator Workshop for IBM i

Kód kurzu: AS27G

This course is designed to enhance the skills of a IBM i System Operator. In this class, we will explain the concept of how LPAR works and discuss the functions provided by the HMC. We will discuss the IBM i Access Family of products in general and Access Client Solutions, specifically.We will discuss the different types of security that you can implement in order to control who has access to your data and what they can do with that data if they are allowed access. We will discuss security control via system values, user and group profiles, authorization lists, and adopted authority.
