

IBM MQ V9 System Administration (using Windows for labs)

Kód kurzu: WM153G

This course provides technical professionals with the skills that are needed to administer IBM MQ queue managers on distributed operating systems and in the Cloud. In addition to the instructor-led lectures, you participate in hands-on lab exercises that are designed to reinforce lecture content. The lab exercises use IBM MQ V9.0, giving you practical experience with tasks such as handling queue recovery, implementing security, and problem determination. Note: This course does not cover any of the features of MQ for z/OS or MQ for IBM i. For information about other related courses, see the IBM Training website: <http://www.ibm.com/training>

Pro koho je kurz určen

This course is designed for technical professionals who require the skills to administer IBM MQ queue managers on distributed operating systems, in the Cloud, or on the IBM MQ Appliance.

Co Vás naučíme

After completing this course, you should be able to:

- Describe the IBM MQ deployment options
- Plan for the implementation of IBM MQ on-premises or in the Cloud
- Use IBM MQ commands and the IBM MQ Explorer to create and manage queue managers, queues, and channels
- Use the IBM MQ sample programs and utilities to test the IBM MQ network
- Enable a queue manager to exchange messages with another queue manager
- Configure client connections to a queue manager
- Use a trigger message and a trigger monitor to start an application to process messages
- Implement basic queue manager restart and recovery procedures
- Use IBM MQ troubleshooting tools to identify the cause of a problem in the IBM MQ network
- Plan for and implement basic IBM MQ security features
- Use accounting and statistics messages to monitor the activities of an IBM MQ system
- Define and administer a simple queue manager cluster

Požadované vstupní znalosti

Technical Introduction to IBM MQ - (WM103G)

Technical Introduction to IBM MQ - (ZM103G)

Basic knowledge of IBM MQ V9 concepts and features, obtained either through experience or by successfully completing

Technical Introduction to IBM MQ (WM103G) or Technical Introduction to IBM MQ (ZM103G)

Ability to invoke standard functions within the operating system that is used in the lab exercises

Some knowledge of TCP/IP configuration

Osnova kurzu

Course introduction IBM MQ review IBM MQ installation and deployment options

Creating a queue manager and queues

Exercise: Using commands to create a queue manager and queues

Introduction to IBM MQ Explorer

Exercise: Using IBM MQ Explorer to create queue managers and queues

Testing the IBM MQ implementation

Exercise: Using IBM MQ sample programs to test the configuration

Implementing distributed queuing

IBM MQ V9 System Administration (using Windows for labs)

Exercise: Connecting queue managers

IBM MQ clients

Exercise: Connecting an IBM MQ client

Implementing trigger messages and monitors

Exercise: Implementing a trigger monitor

Diagnosing problems

Exercise: Running an IBM MQ trace

Implementing basic security in IBM MQ

Exercise: Controlling access to IBM MQ

Backing up and restoring IBM MQ messages and object definitions

Exercise: Using a media image to restore a queue

Exercise: Backing up and restoring IBM MQ object definitions

Introduction to queue manager clusters

Exercise: Implementing a basic cluster

Monitoring and configuring IBM MQ for performance

Exercise: Monitoring IBM MQ for performance
