

IBM InfoSphere Advanced QualityStage V11.5

Kód kurzu: KM413G

This course will step you through the QualityStage data cleansing process. You will transform an unstructured data source into a format suitable for loading into an existing data target. You will cleanse the source data by building a customer rule set that you create and use that rule set to standardize the data. You will next build a reference match to relate the cleansed source data to the existing target data.

Pro koho je kurz určen

The intended audience for this course are:

- QualityStage programmers
- Data Analysts responsible for data quality using QualityStage
- Data Quality Architects
- Data Cleansing Developers
- Data Quality Developers needing to customize QualityStage rule sets

Co Vás naučíme

This course will step you through the QualityStage data cleansing process. You will transform an unstructured data source into a format suitable for loading into an existing data target. You will cleanse the source data by building a customer rule set that you create and use that rule set to standardize the data. You will next build a reference match to relate the cleansed source data to the existing target data.

Požadované vstupní znalosti

Participants should have:

- Completed the QualityStage Essentials course, or have equivalent experience
- familiarity with Windows and a text editor
- familiarity with elementary statistics and probability concepts (desirable but not essential)

Osnova kurzu

Modify rule sets

Build custom rule sets

Standardize data using the custom rule set

Perform a reference match using standardized data and a reference data set

Use advanced techniques to refine a Two-source match
