

# Developing and Deploying AI/ML Applications on Red Hat OpenShift AI with Exam

Kód kurzu: AI268

Developing and Deploying AI/ML Applications on Red Hat OpenShift AI (AI267) provides students with the fundamental knowledge about using Red Hat OpenShift for developing and deploying AI/ML applications. This course helps students build core skills for using Red Hat OpenShift AI to train, develop and deploy machine learning models through hands-on experience. This course is based on Red Hat OpenShift® 4.14, and Red Hat OpenShift AI 2.8. The Red Hat Certified Specialist in OpenShift AI Exam (EX267) is included in the offering.

| Pobočka | Dnů | Cena kurzu | ITB |
|---------|-----|------------|-----|
| Praha   | 3   | 2 237 €    | 0   |

Uvedené ceny jsou bez DPH.

## Termíny kurzu

| Datum      | Dnů | Cena kurzu | Typ výuky | Jazyk výuky | Lokalita         |
|------------|-----|------------|-----------|-------------|------------------|
| Dohodou    | 4   | 2 237 €    | Online    | EN          | Red Hat - Online |
| 18.11.2025 | 4   | 2 237 €    | Online    | EN          | Red Hat - Online |
| 24.11.2025 | 4   | 2 237 €    | Online    | EN          | Red Hat - Online |
| 16.03.2026 | 4   | 2 237 €    | Online    | EN          | Red Hat - Online |

Uvedené ceny jsou bez DPH.

## Pro koho je kurz určen

- Data scientists and AI practitioners who want to use Red Hat OpenShift AI to build and train ML models
- Developers who want to build and integrate AI/ML enabled applications
- MLOps engineers responsible for installing, configuring, deploying, and monitoring AI/ML applications on Red Hat OpenShift AI

## Co Vás naučíme

As a result of attending this course, you will understand the foundations of the Red Hat OpenShift AI architecture. You will be able to install Red Hat OpenShift AI, manage resource allocations, update components and manage users and their permissions. You will also be able to train, deploy and serve models, including how to use Red Hat OpenShift AI to apply best practices in machine learning and data science. Finally you will be able to create, run, manage and troubleshoot data science pipelines.

- Introduction to Red Hat OpenShift AI
- Data Science Projects
- Jupyter Notebooks
- Installing Red Hat OpenShift AI
- Managing Users and Resources
- Custom Notebook Images
- Introduction to Machine Learning
- Training Models
- Enhancing Model Training with RHOAI
- Introduction to Model Serving
- Model Serving in Red Hat OpenShift AI
- Introduction to Workflow Automation
- Elyra Pipelines

# Developing and Deploying AI/ML Applications on Red Hat OpenShift AI with Exam

- Kubeflow Pipelines

## Požadované vstupní znalosti

- Experience with Git is required
- Experience in Python development is required, or completion of the Python Programming with Red Hat (AD141) course
- Experience in Red Hat OpenShift is required, or completion of the Red Hat OpenShift Developer II: Building and Deploying Cloud-native Applications [D0288] course
- Basic experience in the AI, data science, and machine learning fields is recommended

## Osnova kurzu

### Introduction to Red Hat OpenShift AI

Identify the main features of Red Hat OpenShift AI, and describe the architecture and components of Red Hat AI

### Data Science Projects

Organize code and configuration by using data science projects, workbenches, and data connections

### Jupyter Notebooks

Use Jupyter notebooks to execute and test code interactively

### Installing Red Hat OpenShift AI

Installing Red Hat OpenShift AI by using the web console and the CLI, and managing Red Hat OpenShift AI components

### Managing Users and Resources

Managing Red Hat OpenShift AI users, and resource allocation for Workbenches

### Custom Notebook Images

Creating custom notebook images, and importing a custom notebook through the Red Hat OpenShift AI dashboard

### Introduction to Machine Learning

Describe basic machine learning concepts, different types of machine learning, and machine learning workflows

### Training Models

Train models by using default and custom workbenches

### Enhancing Model Training with RHOAI

Use RHOAI to apply best practices in machine learning and data science

### Introduction to Model Serving

Describe the concepts and components required to export, share and serve trained machine learning models

### Model Serving in Red Hat OpenShift AI

Serve trained machine learning models with OpenShift AI
