VMware Cloud Foundation - Solution Architecture and Design [V9.0]

Kód kurzu: VMW_VCFSAD

This five day course explores the architecture and design considerations for an initial deployment of VMware Cloud Foundation (VCF). The course explains the architecture framework and language, as well as design considerations for building, operationalizing, and consuming a VMware Cloud Foundation deployment. The scope of the course is centered on the core design considerations applicable to a VMware Cloud Foundation deployment in a single site.

Pobočka	Dnů	Cena kurzu	ITB
Praha	5	55 000 Kč	0
Brno	5	55 000 Kč	0
Bratislava	5	2 280 €	0

Pro koho je kurz určen

Technical and Solution Architects and Consultants who design enterprise-grade private cloud environments.

Co Vás naučíme

By the end of the course, you should be able to meet the following objectives:

- Describe and apply an appropriate design framework.
- Apply a design process for gathering requirements, constraints, assumptions and risks.
- Understand VMware VCF constructs such as site, fleet and instance.
- Understand data center fabric needs to support VCF.
- Understand VCF storage and network design options.
- Design a single site single fleet deployment of VCF with recommended design options.
- Design management and workload domains with appropriate compute and storage resources.
- Design a consumption layer leveraging VCF Automation and Supervisor.
- Understand the day-2 operating model, operations metrics, and reporting needs of VCF.
- Understand future opportunities to extend the VCF platform with advanced services.

Osnova kurzu

1. Course Introduction
   - Introduction and course logistics
   - Course Objectives
2. Architecture Frameworks and Models

GOPAS Praha
Na Strži 2097/63
140 00 Praha 4 - Krč
Tel.: +420 226 201 390
info@gopas.cz

GOPAS Brno
Nové sady 996/25
602 00 Brno
Tel.: +420 530 513 590
info@gopas.cz

GOPAS Bratislava
Dr. Vladimíra Clementisa 10
Bratislava, 821 02
Tel.: +421 902 903 132
info@gopas.sk

- Architecture Frameworks
- Business Objectives
- Design Models

3. VMware Cloud Foundation Overview
   - VCF Design Blueprints and Use Cases
   - Upgrade Overview
   - License Management Overview
4. VCF Fleet and Instance Design
   - Sites, Fleets and Instances
   - Management and Workload Domains
   - Designing Conceptual and Logical Designs
   - VCF Operations Platform Design
5. Building the Physical Fabric and VCF Networking Design
   - Networking Fabric Design
   - VCF Networking Design
6. Storage and vSAN Essentials
   - VCF Storage Overview
   - Storage Design Considerations
7. Management Domain
   - Management Domain Design Overview
   - Management Domain Design Sizing Considerations
   - Management Domain Design Decisions
   - Storage Requirements for Management Workloads
   - Networking Requirements for Management Workloads
   - Platform-Based Protection Mechanisms
8. Workload Domains
   - Workload Domain Design Overview
   - Cluster Design Overview
   - Storage Requirement for Workload Domains
   - Networking Requirements for Workload Domains
   - Security Design Considerations
9. VCF AMPRS Considerations Summary
   - Designing for Availability
   - Designing for Manageability
   - Designing for Performance
   - Designing for Recoverability
   - Designing for Security
10. VCF Consumption Design with VCF Automation and Supervisor
    - VCF Automation Overview
    - VCF Automation Tenancy Models
    - VCF Automation and Supervisor Components
    - VCF Automation and Supervisor Design Considerations
11. Day 2 Operations with VCF
    - Day 2 Operations Overview
    - VCF Operations Overview and Metric/Dashboard Design
    - VCF Operations Key Metrics for Compute, Storage and Networks
    - VCF Operations for Networks Overview and Design

12. VCF Upgrade Considerations
    - VCF Upgrade Overview
    - VCF Upgrade Key Considerations
13. VCF Advanced Services
    - Introduction to Private AI
    - Introduction to VMware Live Recovery
    - Introduction to Advanced Security
