

Technology Fundamentals for SAP S/4HANA and SAP Business Suite

Kód kurzu: SAPTEC

Would you like to understand how SAP systems function? This course introduces the technology fundamentals of most SAP applications (incl. SAP S/4HANA and SAP Business Suite), how SAP systems function, as well as an introduction to different user interfaces, such as SAP Fiori or SAP GUI. The training contains hands-on exercises in an SAP S/4HANA system and other SAP applications. The course will also introduce learners to the SAP strategy and provides an overview of cloud topics. After completing this course, users will have acquired the fundamental technology knowledge necessary to follow the learning path to their choice of business role ranging from SAP System administrator to developer to user interface expert or to project or program manager. Course based on software release: SAP S/4HANA 2021, ABAP Platform 2021, AS ABAP 7.56.
